

LANSARE.VERIFY

RISK ASSESSMENT PORTAL

LANSARE.VERIFY is a cloud-based solution for conducting comprehensive information security risk assessments and managing cybersecurity and data privacy risks. **VERIFY** provides a collaborative user experience for gathering information, managing critical risks and measuring the performance of your information security risk program.

Meaningful Risk Assessments

- Collaborate with internal staff, vendors and third-parties during all phases of the assessment.
- Utilize standardized assessment profiles and questionnaires, or create your own.
- View recently added documents, comments, review notes and easily share with team.
- Identify, prioritize and assign remediation items, and track progress against due dates.

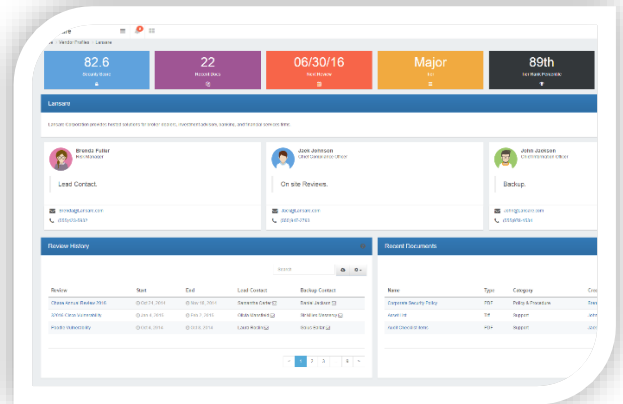

View the status of any assessment including recent activity, outstanding items, key contacts and timeline.

Powerful Auditor Dashboard

- Quickly analyze site activity across all open engagements.
- Access recently posted documentation, email, comments and remediation evidence.
- Take action on open and past due requests.

Simplified Vendor Due Diligence

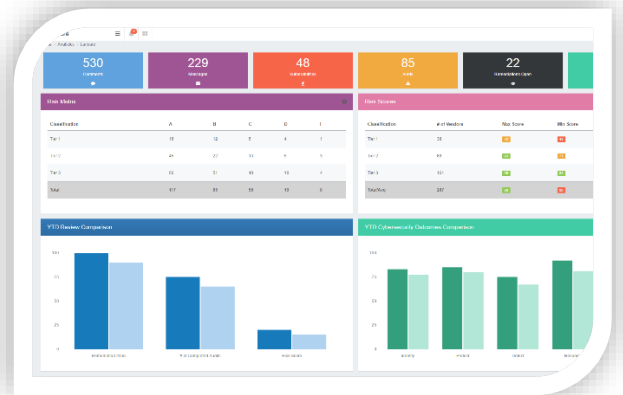

- Create risk profiles for all vendors.
- Prioritize critical risks and key vendors.
- View recent activity and open requests.
- Analyze performance against vendor stated control objectives.
- Manage risks that emerge outside of regular review cycles.

Collaborate with vendor contacts, evaluate risk and view recent activity from the Vendor Dashboard.

Comprehensive Executive Dashboard

- Review snapshots of activity across your firm.
- Quickly identify critical risks.
- Analyze key performance metrics.
- Demonstrate oversight and supervision.

Provide executives with summary views of enterprise level data, activity and analytics.
